

**CONTROLLING NON-STRATEGIC
NUCLEAR WEAPONS**

OBSTACLES AND OPPORTUNITIES

Edited by

Jeffrey A. Larsen

and

Kurt J. Klingenberger

June 2001

The USAF Institute for National Security Studies

The USAF Institute for National Security Studies, located at the US Air Force Academy in Colorado Springs, was created in 1992 for the purpose of promoting national security research for the Department of Defense within the military academic community, and supporting the Air Force national security education program. INSS coordinates and focuses outside thinking in various disciplines and across the military services to develop new ideas for defense policymaking. The Institute develops topics, selects researchers, administers sponsored research, hosts conferences and workshops, and facilitates the dissemination of its findings to a wide range of private and government organizations. Its research focuses on arms control, proliferation, regional studies, Air Force policy, information warfare, environmental security, and space policy. Its primary sponsors include the National Security Policy Division, Nuclear and Counterproliferation Directorate, Headquarters US Air Force (AF/XONP), and the Dean of Faculty, USAF Academy.

Portions of this book may be quoted or reprinted without permission, provided that a standard source credit line is included. INSS would appreciate a courtesy copy of reprints or reviews.

USAF/INSS publications are available from the Institute for National Security Studies at 719-333-2717, or by writing to: Institute for National Security Studies, HQ USAFA/DFE, 2354 Fairchild Drive, Suite 5L27, USAF Academy, CO 80840.

The editors wish to thank the people who played such an important role in the success of the November 2000 conference and this subsequent book. The primary government sponsor organization, the National Security Policy Division (XONP) of Headquarters US Air Force, provided foresight and financial support in making this intellectual gathering possible. The Airlie House Conference Center in Warrenton, Virginia provided a wonderful venue for our meetings, and proved immensely accommodating and flexible when necessary.

The Air Staff's prime contractor in organizing this event was Science Applications International Corporation (SAIC). A number of people in both organizations were critical to the success of the conference and associated book: within XONP, Colonel Kurt Klingenger, Lt Colonel Charles McKee, and Major James Gray; and from SAIC, Forrest Waller, James Toles, Alex Ivanchishin, Jeffrey Larsen, and Lisa Palmertree.

Thanks to Robert Irvine of the NATO International Staff for his help in refining several of the papers dealing with NSNW in Europe, and to Ted Warner of the RAND Corporation for his ideas and comments at the conference—some of which found their way into the introduction.

We also extend special recognition to Dr. James Smith and his staff of the USAF Institute for National Security Studies, Major Brent Talbot and Mrs. Diana Heerdt, for their advice and support in converting our manuscript into a published book. The cover was created by Norman Tancioco of the Graphic Arts Division at the US Air Force Academy.

Finally, thanks to each of the conference presenters and chapter authors who responded to the editors' requests for inputs and changes in a timely manner. This book would not have been possible without that cooperation. Despite

the editors' best efforts, should any errors remain, they remain solely their responsibility.
