Vol. 50, No. 30 July 30, 2010

Board of Visitors tours USAFA

Cadet 1st Class Stephen Pike of Cadet Squadron 21 describes the Air Force Academy’s unmanned aerial system airmanship program to Gina Salazar and BJ Barger during the Academy Board of Visitors’ tour of the Academy Airfield Saturday. Also pictured is Cadet 2nd Class Travis Potthoff of CS 39. Ms. Salazar, the deputy district director for Rep. Jared Polis (D-Colo.), attended in the congresswoman’s stead. Ms. Barger is the deputy assistant secretary for force management integration at the Pentagon.

Community celebrates Attic reopening

By Staff Sgt. Don Branum
Air Force Academy Public Affairs

The Air Force Academy community celebrated the grand reopening of the Airman’s Attic at its new location in Douglass Valley Housing Tuesday.

Col. Rick LoCastro, commander of the 10th Air Base Wing, welcomed Airmen and families from the Academy and other local installations to “what we know is the best Airman’s Attic in the Department of Defense.”

Cassie Nordin, the Airman’s Attic volunteer manager, cut the ribbon at the ceremony. Joining her and Colonel LoCastro were Brian Binn, president of the Colorado Springs Chamber of Commerce Military Affairs Council; Paula Gould, wife of Academy Superintendent Lt. Gen. Mike Gould; T. Thompson, CEO and president of the Academy’s Association of Graduates; and roughly a dozen Airman’s Attic volunteers. The Air Force Academy Band’s Blue Steel ensemble provided music both before and after the official portion of the ceremony.

The Airman’s Attic is now located on the easternmost side of the Douglass Valley Housing Area, near the intersection of East Douglass and East Ponderosa drives.

“We’re bringing the Airman’s Attic where the Airmen are: in housing,” Colonel LoCastro said. “You’ll have family members who’ll drive by the Airman’s Attic every day, and the instant they walk through the door, they’ll be repeat customers. You’ll be amazed at what’s in there.”

A handful of customers shopped at the Attic immediately after the ceremony. One of those customers was Jaime Gaines, the wife of Army Pfc. Jesse Gaines.

“Most of our money goes to bills, so this helps out a lot,” said Mrs. Gaines, whose 14-month-old daughter, Jordan, eagerly helped her pick out new babies’ clothing. “There’s more selection here than at the previous Airman’s Attic. The old attic was pretty crowded.”

The case of Robin Sage and OPSEC

By Navy Petty Officer 2nd Class Eliott Fabrizio

Armed with Science Blog

Adding tons of Facebook friends doesn’t necessarily make you popular; it may actually put you and the Defense Department’s information security at risk — especially when you have friends you don’t even know.

Provide Security, a cyber security company, illustrated this danger with the Robin Sage Experiment. The experiment created fake Facebook, Twitter and LinkedIn profiles under the alias “Robin Sage.” A photo of a cute girl (borrowed from a personal website) and the name “Cyber Threat Analyst” completed the fake profiles.

From there, Thomas Ryan, co-founder and managing partner at Provide Security, posing as Robin, sent requests and established social network connections with more than 300 professionals in the National Security Agency, DOD, and Global 500 corporations.

Robin’s new friends revealed information to Ryan that violated military operational security and personal security restrictions.

“The worst compromises of operational security I had were troops discussing their locations and what time helicopters were taking off,” Ryan said during a phone conversation.

People also sought Robin’s professional advice, invited her to dinners, and offered her job opportunities. Not bad security I had were troops discussing their locations and what time helicopters were taking off,” Ryan said during a phone conversation.

“From one person I was profiling, I was able to get all the security questions for their email and bank account,” Ryan said. “These are questions like, ‘What was your first car?’”

“I don’t even want people I know to have access to my e-mail or bank account, much less anybody on the Internet with audacity to send out a friend request from a fake profile.”

From time to time, I have received a random friend request from a person I don’t know, usually accompanied by a profile picture of a pretty girl, but I have this rule of thumb: if I haven’t met you, we aren’t friends yet. Megan Fox is the only exception to this rule.

According to Ryan’s report, an inspection of Robin Sage’s profile would have revealed her claimed 10 years of cyber security experience would have put her in the career field at age 15.

During the experiment, one person checked the alumni records of the Massachusetts Institute of Technology, her claimed educational background, and this effort confirmed that MIT had no record of a Robin Sage.

The danger isn’t social networking itself. The danger is doing it carelessly.

According to DOD’s directive-type memorandum concerning social media and Internet capabilities, it is the responsibility of military leaders on all levels to ensure the safety of DOD and personal information.

All servemembers must be aware of operational security when using communications such as telephone lines and e-mail; however, information posted through social media should be regulated the same way, despite the casual feel of many of these sites.

Having a friend you don’t know means that virtually anyone could be monitoring your activities and the information in your posts, and if you post as much as some of my friends, that means they’d know almost everything about your schedule right down to that “epic cheeseburger” you ate.

Social media is a great tool for networking and communication, if you’re careful about the information you’re sharing and who has the privileges to view it. So for anyone hoping to be my friend in the social media realm, you’ll have to at least buy me dinner first.

Character Corner: Enduring Theme Model

By Maj. Thomas DeVore

Center for Character and Leadership Development

The summer months at the Air Force Academy are far from typical. Even when the academic year has come to a close, the workload for staff and activities for the cadets continue.

The Center for Character and Leadership Development is currently facilitating multiple programs, such as honor lessons, as well as planning for future programs, such as the National Character and Leadership Symposium. In alignment with the strategic goals of the CCLD, theme development for NCLS is a collaborative effort that is generated by cadets, and facilitated by faculty and staff.

However, this has traditionally been a year-to-year endeavor, requiring substantial time and effort.

In response to this, the CCLD has implemented deliberate planning and repeatable processes in an effort to increase efficiency. Starting with NCLS 2011, theme generation is guided by the “Enduring Theme Model,” a structured sequence that repeats every four years.

NCLS themes will be anchored to a “core concept” derived from the four NCLS objectives, related to Academy Outcomes and paired with the graduating class’ color:

- Blue Year: Ethical Reasoning
- Silver Year: Moral Courage
- Red Year: Foundation of Character
- Gold Year: Empowered Leadership

As the class of 2011 is a gold year, the NCLS theme for 2011 will be anchored to the core concept Empowered Leadership, through the specific year’s “long title” theme will remain unique and generated by cadets.

The CCLD is optimistic that this framework for NCLS planning will reinforce the concept of cadet ownership and further establish the event as a premier forum for cadet leadership opportunities throughout the year.
When Capt. Tess Marcial arrived in Paktya province, Afghanistan, as part of a medical embedded training team, her responsibilities weren’t immediately clear. She found out soon enough, and she ended up fulfilling them so well that her six-month deployment was crowned with two awards, a Bronze Star and an Army Achievement Medal, which she received during a 10th Air Base Wing commander’s call June 29.

Earning two commendations in that short a time is a noteworthy achievement, but they come as no surprise to Captain Marcial’s superior officer.

“While the most I’m not surprised,” said Col. Leslie Ness, the administrator for the 10th Medical Group. “Every (Medical Service Corps Airman) we send out the door has done a great job. It does take a special breed to go in there, understand their culture and figure out how to try to help.”

Captain Marcial was part of the medical training team at Forward Operating Base Lighting. Team members were tasked with helping Afghan care providers around Paktya province, in the east-central part of the country.

At the Paktya Regional Military Hospital in Gardez, Captain Marcial helped develop the Women’s and Children’s Clinic, which provides medication, immunizations and other services to the Afghan National and Children’s Clinic, which provides medication, immunizations and other services to the Afghan National Security Forces and their families.

“Approaching and provide materials,” but the patients need to trust and gain confidence in the medical professionals available to them,” Captain Marcial said in a December 2009 interview. “It’s taking a special breed to go in there, understand their culture and figure out how to try to help.”

Captain Marcial said her job as an administrator dealt mostly with coordination and attempts to improve processes. For example, she worked to show hospital personnel how best to use and distribute medical supplies. She also devised strategies to overcome the mentality that the services were open only to members of the Afghan National Army. In a country with next to no widespread advertising and broadcasting, her outreach efforts started with simple give-aways and grew based on word of mouth.

“You have to accept that their facility is never going to look like your facility,” Captain Marcial said. “For me, it’s more about, ‘Can they sustain after I leave? Have I put the right thoughts in their minds?’”

In the citation for Captain Marcial’s Bronze Star, she is commended for directing “numerous events that impacted the United States and Afghanistan’s National Medical Care Policy objectives and standards of medical care.” The citation further states that “she was vital to ensuring mass casualty readiness.”

Her own skills were tested after a suicide bombing in Gardez, and the Army Achievement Medal attests to her response. She coordinated three separate aeromedical evacuations and took charge of FOB Lighting’s troop medical clinic so medical teams could respond at Paktya Regional Hospital. The citation states that her “unselfish actions were integral to saving numerous lives.”

Captain Marcial is no stranger to awards. While stationed at Hickam Air Force Base, Hawaii, she was named the Pacific Air Force’s outstanding health plan manager of the year for 2004. Two years later, she was one of four Airmen selected for an Air Force scholarship that pays for completion of a graduate degree at a civilian institution. In addition, she received the Eugenie D. Sontag Scholarship from the University of Colorado at Denver, and she earned a master’s degree in health administration in May 2008.

She also revived Retiree Appreciation Day at Hickam AFB. Before her intervention, the event had not been held in the Pacific Region for 15 years. She was on leave when the Academy held its Retiree Appreciation Day last week, but she hasn’t ruled out taking part next year.
Airmen, cadets get ‘tattooed’ in UK

By David Edwards
Academy Spirit Staff Writer

Several Airmen from the Air Force Academy recently spent a couple of days getting tattooed — and they traveled all the way to England for it.

If that revelation conjures up images of ink, needles and skin, picture instead military aircraft, awed spectators and skies over the British Isles.

This Tattoo is actually an airshow. Not just any airshow, mind you, but the Royal International Air Tattoo, recognized by the Guinness Book of World Records as the largest military airshow in the world.

No less of an authority than Apollo 11 astronaut Buzz Aldrin has called it the best airshow around. And retired Air Force Gen. John Jumper said, “This is my favorite airshow. I am always proud to come back.”

They’ll get no argument from Capt. Dan Walker and the group he led to Royal Air Force Fairford. The Academy contingent featured representatives from the 396th Flying Training Group.

“The scale when we got there was enormous,” said Cadet 1st Class Pat Gill of Cadet Squadron 37. “Taking off and performing my demo in front of 200,000 people, that’s not something I’m going to forget anytime soon.”

Servicemembers from dozens of countries participated in the Tattoo, and the U.S. Air Force is well established there. This year also marked the 70th anniversary of the World War II Battle of Britain, and officials commemorated those dark days with a stirring display of period aircraft, including German Messerschmitts.

Academy seniors from two squadrons received rock-star treatment during and after their displays of glider and parachuting prowess. They brought with them a TG-10C aerobatic glider and a C-17 Globemaster III from which the eight parachutists in the 98th Flying Training Squadron jumped during their demonstration.

In addition, Capt. Jack Nelson of the 557th FTS manned a static display of a T-52A, known commercially as the DA-40. The plane was provided by Austrian company Diamond Air. Captain Nelson’s exhibit was visited by thousands of people, all of whom were “very into it,” he said. “This was a great way to get the word out about our programs, and also a great way to reward our most deserving cadets.” Captain Nelson said.

The Tattoo also provided the Academy with a lot of firsts — too many to count,” Cadet Gill said. Captain Walker said that as far as he knows, this was the first time the Academy had participated in the Tattoo, and it was also the first time the cadets had even heard of the event.

Unfortunately for the cadets, the weather in Fairford on the second of the two scheduled performance days was, well, English. So they took full advantage of a beautiful Saturday: “We had to make that one count,” said Cadet 1st Class Keenan Ryner of CS 04, spokesman for the Air Force Wings of Blue Parachute Demonstration Team. Their C-17 made two passes of four jumpers each, and the parachutists’ path back to the plane took them right into the crowd, which heaped adulation on them.

Besides the performances, the cadets and their commanders were surrounded by their fellow in the militaries of a diverse array of countries, such as Jordan and host Great Britain. They eagerly mingled with their new friends and found themselves trading questions and answers. “It was almost a culture shock because we’re used to the way we do things here in America,” Cadet Ryner said. “I’d pay money to go see that airshow. We really hope we (the Academy cadets) get invited back.”

All of the group’s members enjoyed the commemoration of the Battle of Britain, too. Cadet Gill said it was a bit surreal to see Nazi swastikas in contemporary Europe.

Warplanes flew in tight formation, and the portrayal ended with the German and British planes flying together in a show of solidarity.

The Academy representatives enjoyed their experience at the Tattoo so thoroughly that they ran out of superlatives to describe it. “I was extremely impressed with how it was set up, and the hospitality was outstanding,” Captain Walker said. “It was like everybody was there just to see you.”
Newest falcon stretches her wings

By David Edwards
Academy Spirit Writer

Visitors to the Air Force Academy wouldn’t be surprised to hear someone say, “Look. It’s a plane.” At the Community Center library July 22, though, they were saying — maybe not in so many words — “Look. It’s a bird.”

It was two birds, in fact. A crowd of perhaps 70 came to watch a trio from the cadet falconers and two of their aviary stars, Cody and “the baby.”

Cody is an 18-year-old prairie falcon and the oldest of the group’s birds. The baby, alternately referred to as “Alice,” “Athena” or “Valkyrie,” is an 8-week-old gyrfalcon. Both enthralled the group of inquisitive youngsters, parents and grandparents, and neither of them was the least bit camera-shy.

The baby waved the onlookers with her wingspan. At the end of the presentation, eager children asked the handlers if they could pet the two birds of prey that had captured their attention from Minute 1.

“If you put Cody on one end of the football field and a newspaper on the other end, Cody could read it — if he knew how to read,” said Cadet 2nd Class Yagie Janisch of Cadet Squadron 32, explaining falcons’ keen eyesight, which is six or seven times more acute than a human’s.

Joining Cadet Janisch were Cadet 1st Class Gabe DeLong from CS 40 and Cadet 2nd Class Jenny Flynn from CS 31. Cadet Flynn had the baby falcon perched on her gloved hand.

“They’re really well-natured birds, but sometimes they can get ornery,” Cadet DeLong said. The Academy’s falcons tend to live about twice as long as their counterparts in the wild because they are treated with great care and attention to detail.

Cadet Janisch was ready with the answer when a boy in the crowd asked about the falcons’ diet. “They eat (flash-frozen) Japanese quail, which in some parts of the world is considered a delicacy,” she said. “They’re very spoiled. (In the wild), they’re air-to-air-combat hungry. In the Academy, they’re air-to-air-combat predators, so they don’t hunt anything on the ground.”

The menu at the Academy also helps explain why the birds don’t fly off and disappear. They rely on the falconers for food, and they are not trained to hunt. Hunger brings them back home. But falconers do attach a telemetry device to the birds just in case they wander off, which happens occasionally, Cadet DeLong said.

Falconry is one of the numerous clubs available to cadets. Being selected is a prestigious honor, because each new school year typically brings 30 to 40 applicants, and only four cadets from each class are chosen. The cadet falconers number 13 in all.

When members of the Class of 1959 — the Academy’s first — chose the falcon as mascot of the cadet wing, they left the question of species open-ended, so the Academy’s mascot can be a falcon of any species.

Aurora, a member of the largest falcon species, gyrfalcons, is the mother of the baby falcon. Once the new school year starts, cadets will choose a permanent name for the new bird.

In North America, there are five native falcon species, including the reigning speed demon of the animal kingdom, the peregrine falcon. Others include the prairie falcon, the American merlin and the American kestrel. The cadet falconers exhibit four of the five native species.

Thanks to an agreement between the Academy and United Airlines, the birds are allowed to travel in the passenger cabin with their handlers. In a 2008 interview with 5280 magazine, then-Cadet 2nd Class Jacque Harrier said, “It’s pretty interesting when you sit next to a stranger and you’ve got a bird on your arm. It’s a good way to get people to know about the Academy. It’s a pretty easy conversation-starter.”

It was clear from the Community Center exhibition just how much the falconers enjoy their special work. Among NCAA schools, the falconry program is unique, and it has won a litany of accolades.

Though the falconry program is not designed to rehabilitate, the cadets are trying to do just that for Buzz, a 1-year-old kestrel falcon in the cadets’ care.

“Although they’re amazing birds, we have to take good care of them,” Cadet Janisch said. “Every falconer who has ever visited our facility said that ours is the best they’ve ever seen.”

Boy Scouts get info on Academy

Cadet 3rd Class Nathan Lebens hands out information about the Air Force Academy to visitors during the 2010 National Boy Scout Jamboree at Fort A.P. Hill, Va., Wednesday.

With Cadet Lebens is Havoc, a 14-year-old peregrine falcon. The Wings of Blue Air Force Parachute Demonstration Team jumped in to open the Jamboree Monday.
Cadets carry injured hiker to Pikes Peak summit

By Staff Sgt. Don Don Branum
Air Force Academy Public Affairs

When two cadets from the Air Force Academy decided to hike Pikes Peak July 17, “become heroes” was not on the itinerary. But by the time they reached the 14,110-foot summit — carrying a hiker who had broken her foot two miles from the top — they had at least one person’s heartfelt gratitude.

Cadets 1st Class Stephen Shaffer from Cadet Squadron 12 and Stephen Newell from CS 32 set out on the Barr Trail early that morning to hike a round trip on the trail, which stretches about 13 miles and climbs 7,000 feet from the trailhead in Manitou Springs.

“I’m big into the outdoors — hiking, hiking, fishing,” said Cadet Shaffer, who played for the Falcons football team before two concussions prematurely ended his football career. “I’d hiked a few ‘fourteener,’ but I hadn’t hiked Pikes Peak, and I look at it every day.”

The cadets reached Barr Camp, a third of the way along the trail, about two hours after setting out. Around noon, they encountered Marian Steele and her hiking partner above the tree line. Ms. Steele had broken her foot while the two descended from the summit.

“We decided we’d see what we could do to help her,” Cadet Shaffer said.

He and Cadet Newell, a former Falcons linebacker, offered to help the hikers in distress. One of the two jokingly asked if the cadets could carry Ms. Steele to the top, but once they assessed her injuries and the risks of incoming afternoon thunderstorms, they decided that’s exactly what they would do.

“We were worried about being above the tree line with storms rolling in,” Cadet Shaffer said. “We knew we were on the clock. We knew Barr Camp was a few miles down, but that the summit was a few miles closer, and we knew we had to get her medical attention.”

The Barr Trail is at its most grueling above tree line. The atmosphere is already thin at the trailhead, which is about 7,000 feet above sea level. The air pressure at 11,000 feet is two-thirds of air pressure at 11,000 feet, which is about 7,000 feet above sea level. The air pressure at 14,110 feet is about 7,000 feet above sea level, and at 14,110 feet, air pressure is roughly half of sea-level pressure. The human body has to work much harder to get oxygen at higher altitudes, half of sea-level pressure.

“Heat was a factor along with the altitude and the extra weight of (Ms. Steele’s) pack,” Cadet Shaffer said.

The cadets took turns carrying Ms. Steele as they approached the summit. They also stopped frequently to rest, refuel and rehydrate, Cadet Shaffer said. Once they reached the summit, they turned the injured hiker over to El Paso County Search and Rescue, which was at the summit for an unrelated emergency call.

Steve Sperry is the spokesperson for EPSAR, a non-profit agency that does not charge for its services and relies on donations from the local community for its operations.

He praised the cadets’ action but said that attempting to rescue a stranded or injured hiker is a potentially dangerous undertaking.

“The cadets did a great job getting her to the top! In doing so, they also put themselves in jeopardy,” said Mr. Sperry, a retired major who works full-time for the Joint Functional Component Command-Integrated Missile Defense at Schriever Air Force Base. “Safety is always the number-one issue for search and rescue, both for the patient and the rescuers, but if you’re going into the military, sometimes you put others’ well-being above yours, and that’s a good thing.”

Mr. Sperry shared some tips for people hiking the Barr Trail: start the hike early, let someone know where you’re going and when you plan to return, and have an exit plan.

“If you’re going up, have a plan on how to get back down — if the (Cog Railway) train is full, they will not let you on. In the past, we’ve responded to people who were stuck at the top because they didn’t have a plan to get back.”

Cell phone coverage is generally good most of the way up the trail if a hiker becomes stranded or injured, Mr. Sperry said. The other alternative in an emergency situation is to flag down another hiker, as the Barr Trail is well-populated during hiking season.

“By the time we get a page, if we run up Code 3 — that’s sirens going and lights flashing — it’ll take us an hour to get from the rescue base to the top,” he said.

Those preparing for a hike should bring plenty of water, snacks, rain gear, sunscreen and good footwear, he said. But above all, he asked hikers to keep safety in mind from the first planning stages to the last step of the trail and to let trained and equipped SAR professionals handle any rescues.

“We appreciate everything the cadets did,” he said. “They did a super job.”
Private Gaines is assigned to Fort Carson, but he lives with his family at the Academy. They’re not alone: roughly 30 percent of the families who live in base housing here work at other military installations, such as Fort Carson, Peterson Air Force Base or Schriever AFB, Colonel LoCastro said.

“We’re truly a joint family,” he added. “We want to provide a sense of family to all our people who live here, not just Air Force Academy people.”

The Attic is open Mondays from 9 a.m. to 1 p.m., Tuesdays through Thursdays from 11 a.m. to 3 p.m., and the first Saturday of each month from 9 a.m. to 1 p.m. Generally, families of servicemembers with pay grades of E-5 or lower are eligible to shop at the Attic’s Attic, but the facility opens its doors to all families the third Thursday of each month.

“There are no millionaires in the military,” Colonel LoCastro said. “Everyone needs a helping hand sometimes, regardless of rank.”

The Redistribution Center, a Combined Federal Campaign-listed non-profit agency based in Wheat Ridge, Colo., provides supplies for the Attic’s Attic. Families may receive 10 miscellaneous items and 15 pieces of babies’ clothes per week and two furniture items a month. They may also take, within reason, what they need in toddler- to adult-sized clothing and uniforms, Mrs. Nordin said.

“Let’s make sure we can get our Airmen down here to make this a great Attic’s Attic. We’re off to a great start with this great facility,” he added.

Attic volunteers can sign up to receive free child care at the Airman and Family Readiness Center for children 1 and older. The Family Child Care program will accept vouchers if they have space available.

Jaime Gaines looks through clothing for her 14-month-old daughter, Jordan. Her husband, Army Pfc. Jesse Gaines, is assigned to Fort Carson, but the family lives on the Academy.

Cassie Nordin (center, holding scissors) cuts a ribbon to celebrate the grand reopening. Mrs. Nordin is the Attic’s Attic volunteer manager. Also pictured are several volunteers; Paula Gould, wife of Academy Superintendent Lt. Gen. Mike Gould; Col. Rick LoCastro, 10th Air Base Wing commander; and T. Thompson, president and CEO of the Association of Graduates.

Housing residents must register firearms

By Capt. Doug Couch
10th Security Forces Squadron

The 10th Security Forces Squadron will sponsor a two-day registration for housing residents with privately owned weapons Saturday from 9 a.m. to 3 p.m. at the Academy’s Housing Office, Building 6556 on West Columbine Drive.

In accordance with USAFA Plan 31-1, “Installation Security Plan,” anyone residing on base must register any firearm or privately owned weapon stored within their homes. Registration must be accomplished with both 10th SFS and the housing office. Those who fail to comply and are found to have weapons in their homes may be barred from the Academy by the installation commander, could face eviction and/or punitive actions under the UCMJ as applicable.

To register your weapon, come to the Housing Office with an Air Force Form 1314, “Firearms Registration,” coordinated through your first sergeant and signed by your unit commander. You must also have a Department of Defense Form 2760, “Qualification to Possess Firearms or Ammunition,” verifying that you understand and comply with the rules of the Lautenberg Amendment. Residents who are not affiliated with the Defense Department, such as retirees and contractors who do not have commanders or directors, must route the Form 1314 through Forest City Residential Management before processing with Security Forces.

These forms are available at http://usafaliving.com/communitynews_forms.asp. However, you may also register your privately owned weapons by bringing the Air Force Form 1314 and DD Form 2760 to the Pass and Registration Center outside the South Gate weekdays from 7:30 a.m. to 4:30 p.m.

The Security Forces will be working with Forest City to ensure anyone who possesses a privately owned weapon in Academy housing complies with this mandatory policy.

For more information, contact Security Forces at 333-3685.

2,000 attend Retiree Day celebration

By Staff Sgt. Don Branum
Air Force Academy Public Affairs

Approximately 2,000 retirees from the Colorado Springs community attended the Retiree Appreciation Day held at Arnold Hall here Saturday.

Senior Master Sgt. Leonardo Castro, the flight chief for physical therapy and occupational therapy with the 10th Medical Operations Squadron, called the event “a huge success.” Sergeant Castro was one of the Retiree Appreciation Day lead organizers.

Air Force Academy Superintendent Lt. Gen. Mike Gould and his wife, Paula, spoke with retirees both in a large question-and-answer session and in smaller groups throughout the day. Commanders and senior enlisted Airmen from Schriever and Peterson Air Force bases also attended to interact with and to thank — the veterans in attendance.

Cadets visit Machu Pichu

Cadets from the Air Force Academy pose atop Machu Pichu in Peru during a recent cultural immersion visit. The Department of Foreign Languages sends cadets and escorting officers around the world to learn about a host nation through direct contact. Pictured, not in order, are Maj. Luis Linares, Cadet 1st Class Zachary Bell (Cadet Squadron 40), Cadets 2nd Class James Dunlop (CS 01), David Hein (CS 02), Kyle MacDonald (CS 15), Cassandra Pederzani (CS 08) and Hector Valladares (CS 19), and Cadet 1st Class Cody Wheeler (CS 26).
Program puts Academy cadets in ISR world

By Wayne Amann
Air Force ISR Agency Public Affairs

LACKLAND AIR FORCE BASE, Texas — Their visit took one hour. The impression could last their careers.

Thirteen Air Force Academy cadets learned about the “silent warrior” world of the Air Force Intelligence, Surveillance and Reconnaissance Agency July 20 as part of their Operation Air Force visit to Lackland Air Force Base, Texas.

Ops Air Force is a three-week summer program designed to give cadets the opportunity to experience firsthand everything an operational Air Force base has to offer.

“(The Air Force ISR Agency) is a popular stop with the Ops Air Force cadets,” said ‘92 Academy grad Lt. Col. Peter Ohotnicky, commander of Lackland’s 322nd Training Squadron and scheduler for Ops Air Force cadets at Lackland. “[ISR] is a real eye-opener.”

The cadets received a comprehensive Agency mission briefing from Senior Airman Lance Allen of the Commander’s Action Group covering the personnel, organizational structure and capabilities of this intercontinental organization. The briefing was sandwiched between a pair of music videos showcasing the varied missions performed by its 17,000-plus members.

“It’s really good to see the people doing the work out there,” said Cadet 2nd Class Evan McCroskey of Kingsville, Tenn., who’s working toward a degree in cyber warfare. “When I was a freshman, my roommate was a prior enlisted intel guy. Working in intelligence or special operations is what I want to do.”

Chemistry major Cadet 2nd Class Catherine Kiyohta was equally impressed as what the ISR community brings to the fight. “The capabilities we have are pretty amazing,” the Wahiawa, Hawaii, native said. “It’s fascinating to see what we can do.”

Academy grads, Col. Eric Payne, Class of ‘87, the director of Logistics, Installations and Mission Support and Lt. Col. Michael Gayer, Class of ’92, the deputy director of Manpower and Personnel, co-hosted the briefing, shared their ISR experiences and answered questions about careers as an officer and the Air Force in general.

Following the briefing, the cadets received a guided tour of the Air Force ISR Agency Heritage Center from historian Phil Myers, who explained the organization’s legacy of service to the nation since its inception as the U.S. Air Force Security Service in 1948.

The cadets completed their Security Hill visit at 24th Air Force, where they received an overall mission briefing followed by an orientation tour conducted by the crew commander of the Air Force Computer Emergency Response Team.

This was the third group of Ops Air Force cadets, 41 in all, to be introduced to the Air Force ISR Agency this year.

“This is one of many diverse units at Lackland,” Colonel Ohotnicky said. “They have an important mission which is evolving and very important for our current conflicts. We’ve designed our Ops Air Force program to expose cadets to as much of that diversity as possible.

“I hope they come away with a greater understanding and appreciation of the Air Force,” he added. “Most cadets want to become pilots, but as future leaders, all cadets need to be aware of what goes on all across the Air Force to fly, fight and win in air, space and cyberspace.”

The message is getting through.

“At the Academy you’re so focused on maintaining your academic, athletic and military standards, we often forget the bigger picture,” Cadet Kiyohta said.

Operation Air Force helps deliver the big picture perspective.
Board of Visitors
gains perspective
on airmanship

By Staff Sgt. Don Branum
Air Force Academy Public Affairs

etired Col. Sue Ross and a cadet pilot soared through the blue skies above the Air Force Academy Saturday, practicing stall avoidance maneuvers and pull-
ing Gs with only the sound of the wind against their glider to accompany them. Elsewhere, A.J. Scribante and a tandem jumper stepped out of a UV-18 Twin Otter aircraft and hurtled toward the ground below. Ms. Ross, Mr. Scribante and others with the Air Force Academy Board of Visitors took the dive — some in a glider, others with a parachute — to learn more about the airmanship programs available to cadets during a tour here July 23 and Saturday.

“It was amazing. It was a beautiful day, and I had a great instructor pilot,” said Colonel Ross, who flew as a T-38 Talon instructor pilot and as a KC-135 Stratotanker aircraft commander and evaluator pilot during her Air Force career. “These cadets are so articulate and know so much. I know they’ll be great when they go out into the Air Force.”

The 306th Flying Training Group, an Air Education and Training Command unit here, is responsible for the Academy’s airfield and airmanship programs, but cadets here... airmanship program the summer before their sophomore years and become instructors in either their junior or senior years. When Board of Visitors members weren’t in the air, they had a chance to check out static displays on the ground. The static that attracted the most attention was the Academy’s Shadow remotely piloted aircraft, which has a 10-foot wingspan and can be deployed from almost any platforms, including the deck of a Navy destroyer. Twenty-four cadets received their Unmanned Aerial System wings in 2009 and will be instructor pilots for this year’s UAS airmanship courses.

“This program’s definitely an eye-opener,” said Cadet 1st Class Stephen Pike from Cadet Squadron 21. The UAS airmanship training begins with the fundamentals — how to control the aircraft and operate the ground control station. But the course of instruction quickly escalates in the level of challenge it provides, said Maj. Jeffery Ray, who is assigned to the 306th Operations Support Squadron and has previously deployed to both Iraq and Afghanistan as an F-15 Strike Eagle weapons systems officer.

“We use a building-block ap-
proach,” Major Ray said. “Once we take these guys to the next step, which is instructor pilot upgrade, it’s gloves off. ... jump in the program and what we require of them because we’re asking them to make pretty important decisions.

The Academy’s UAS airmanship program exists to ingrain moral and ethical reasoning and develop cadets’ sense of character and leadership, said Brig. Gen. Dana Born, the Academy’s dean of the faculty. Before they graduate, cadets must have the confidence — and the conscience — to make important decisions in real time. “Cadets have to learn how to deal with a multitude of situations and make important decisions in time-critical situations,” General Born said. “We have to ensure that they’re prepared to make the right call on their own. Embracing learn-
ing — having the knowledge, the skills and responsibility embedded in them.”

“There’s no pause button,” Major Ray added. “We’ll talk about deci-
sions during the debrief, but they’ve got to make that decision in the moment.”

Cadet 1st Class Russell Allen of Cadet Squadron 06 gives Susan Schwab a prebrief before taking her on a glider flight at the Air Force Academy Saturday. Ms. Schwab is a member of the Academy’s Board of Visitors, a professor of public policy at the University of Maryland and a former U.S. trade representative.

Cadet 2nd Class Russell Allen of Cadet Squadron 06 reviews a glid-
er safety checklist with Robin Hayes during the Board of Visitors’ tour of the Air Force Academy Airfield Saturday. Mr. Hayes is a former North Carolina congressman and a current mem-
ber of the BOV. Cadet Allen is an instructor pilot for the soaring program.
Basic cadets endured “Sergeant Spain’s House of Pain” and cheered on their comrades during the Sweepstakes and Big Bad Basic competitions Saturday as they finished their field training in Jacks Valley.

The weeks of grueling physical and military training are designed to transform basic cadets and mold them into part of a team. BCT ends at 10 p.m. Saturday. Each basic cadet will become part of one of the Cadet Wing’s 40 cadet squadrons, move into new dorm rooms and prepare for the Acceptance Day parade Wednesday. Their first day of classes will begin Thursday.

Basic Cadet Vance Hawk pulls a 145-pound sled across the finish line with a little encouragement from cadre Saturday. The sled pull was one of several events to take place on “Sergeant Spain’s Course of Pain” during the Sweepstakes competition.

Basic Cadet Jamil Bailey takes on the Assault Course in Jacks Valley Saturday during the Sweepstakes. Cadet Bailey is assigned to the Jaguars Squadron.

Basic Cadets Camille Thompson of Guts Squadron, right, and Victoria Perkins of Interceptors Squadron square off in the Big Bad Basic women’s finals Saturday. Basic Cadet Perkins won the event.
By Andrea Brown  
Academy Spirit Writer

You’ve seen the sobering images on TV of the Gulf Coast: pelicans drenched in brown, syrupy oil. A U.S. Fish and Wildlife Service employee at the Air Force Academy helped rescue some of the birds from this doom.

Gregory Speights recently returned from a two-week reconnaissance and recovery mission, helping save pelicans that would have been lost to the environmental disaster.

Mr. Speights was among a crew of 40 people working 16-hour days on a barge in the marshes of the delta to capture birds for de-greasing at cleaning facilities. BP picked up the tab for the trip.

“The birds start to preen the feathers and ingest some of the oil,” Mr. Speights said.

Birds aren’t the only victims of the spill. “It’s the fish and porpoises, the different kinds of crab,” he said. “They get oilied up, and the birds eat them, and it’s all up the food chain, from plankton on up, eventually to us.”

Pelicans are protected by the Migratory Bird Treaty Act and were recently removed from the endangered species list, Mr. Speights said. “They were making a comeback. It is bad news for them to take a hit,” he said.

The trip brought home the impact of the spill for Mr. Speights. “I went down there for the birds. I love birds,” Mr. Speights said. “They can’t get the oil off by themselves.” But oil on the outside isn’t the birds’ only problem. “The birds start to preen the feathers and ingest some of the oil,” Mr. Speights said.

He had other company on the barge. “We had CNN embedded with us and a college girl doing a documentary,” he said.

Mr. Speights has worked at the Academy since 1974. “I had never done anything like this before. They put out a call to help out with the spill,” he said. “I signed up to go back.”

Others from the Academy plan to join him.
Three Falcons named to preseason all-MWC team

By Staff Sgt. Don Barnum
Air Force Academy Public Affairs

Three Falcons were named to the Mountain West Conference’s 2010 preseason all-conference football team Wednesday as selected by members of the media. Senior defensive back Reggie Rembert had been previously selected for the 2009 all-MWC first team, with senior running back Jared Tew and junior defensive back Anthony Wright Jr. having been named to the 2009 all-MWC second team.

Wounded warriors to ride through Academy

More than 100 wounded warriors will pass through the Air Force Academy Wednesday during the Ride 2 Recovery Rocky Mountain Challenge, a six-day, 325-mile ride from Cheyenne, Wyo., to Fort Carson, Colo.

The Academy portion of the route will carry riders along North Gate, Stadium and South Gate boulevards.

The riders, more than 50 of whom are from Colorado, will also pass through other scenic areas of Colorado such as Garden of the Gods in Colorado Springs and Iron Horse Park on Fort Carson.

Riders will kick off the event Saturday in Cheyenne and ride five miles to Fort Collins, Colo.

Sunday, participants will ride south to U.S. Highway 34 and head west toward Estes Park, a 48-mile journey. They will ride 51 miles through the Roosevelt National Forest Monday, finishing the third day of the ride just south of Boulder. Tuesday’s route carries riders around Denver to the west and south, arriving in Cherry Creek after a 52-mile route.

The riders will head south along the Front Range Wednesday, reaching the Air Force Academy 56 miles into their 66-mile trip for the day. Thursday, they will ride a scenic route through Colorado Springs that ends at Manheart Field on Fort Carson.

The United Service Organizations will support daily rest stops with the USO Canteen, according to a Ride 2 Recovery press release published July 21. The American Legion Riders will provide a motorcycle escort, and the American Legion and Auxiliary will sponsor dinners and community events during the ride.

To learn more about the Ride 2 Recovery, go to http://ride2recovery.com.

Making time to exercise: Routine No. 1

By Sharon Hawkes
Academy Health and Wellness Center

This is the second article in a series of articles that focuses on people who cannot find time to exercise. The first article, published July 16, gave tips on how proper planning and coordinating can help you find time to exercise.

All articles will have a variety of exercise routines every other week for a variety of exercises levels, i.e. beginner, intermediate and advanced. The first workout is a combination of aerobic and strength training, this workout can be accomplished at your workplace.

This workout can be done in 20 to 45 minutes depending on the conditioning level of the participant and the intensity of the workout.

As with any exercise session, always take five to 10 minutes to warm the body up before starting the routine. Go to the nearest stairwell in your workplace to accomplish this stair exercise. If you do not have a stairwell in your workplace, go to nearest building that does have a stairwell. See the instructions below to find your conditioning level and follow the level that corresponds to you.

Beginner
• Choose three flights of stairs
• Repeat three times with a three-minute rest at bottom of first flight.
Duration: 15-20 minutes
Intermediate
• Three or four flights of stairs
• Repeat five times with a two-minute rest at bottom of first flight.
Duration: 20-30 minutes
Advanced
• Four or more flights of stairs
• Repeat six to 10 times with a 90-second to one-minute rest at bottom of first flight.
Duration: 30-40 minutes

Once you are finished the stairwell routine and you are at the bottom of the first flight of stairs, walk around until breathing rate returns to pre-exercise levels.

Strength-training exercises
Squats: These exercises build the muscles in the thigh, shape the postero and improve endurance. Position your feet shoulder width apart, squat down until the tops of your thighs are parallel to the floor, keeping your back straight and your head don’t bounce at the bottom of the movement. Hold that position for a few seconds, then come back to a standing position. Always exhale as you return to a standing position.

Do enough repetitions to achieve muscle fatigue.

Push-Ups: The push-up builds the chest, shoulders and arm muscles. Lie face-down on the floor with your hands at shoulder width apart fingers pointing straight ahead. Make sure your body is straight from head to feet; slowly lower your body down toward the floor until the elbows form a 90-degree angle with the upper arm. Return to the extended arm position without locking the elbows.

Do enough repetitions to achieve muscle fatigue.

Clinic closures
The 10th Medical Group will offer limited appointment availability Aug. 6 due to a 10th Medical Operations Squadron change-of-command ceremony.

Clinics affected include audiology, acute care, allergy and immunizations, cardiopulmonary, dermatology, family practice, internal medicine, mental health, neurology, women’s health, pediatrics and physical therapy and chiropractic.

Normal operations will resume at noon.

CCAF classes available
The Education Office will offer classes through Colorado Christian University that Airmen can apply toward their Community College of the Air Force degrees.

Classes will run in three sessions, starting Aug. 3, Sept. 27 and Nov. 1.

During the first session, CCCU will offer COM 110, Oral Communication, starting Aug. 23, Sept. 27 and Nov. 1.

For more information, contact Derek Wilson at 867-5817.

Volunteer call
Volunteers are needed for each of the following upcoming events.

Special Observances: The Equal Opportunity Office seeks enthusiastic volunteers to plan and coordinate events for Hispanic Heritage Month (Sept. 15 to Oct. 15), National Disability Employment Awareness Month (October) and National American Indian Heritage Month (November). To volunteer, contact EO specialist Gina Moore at 333-4258.

ESOCAMP: The 2010 Environmental, Safety and Occupational Health Compliance Assessment and Management Program needs volunteers to conduct an internal audit Sept. 13-17. The volunteers will present their findings to the 10th Air Base Wing commander in the 10th Civil Engineer Squadron conference room in Building 8120 Sept. 20 at 1:30 p.m. To volunteer as an audit team member, contact Jeannie Duncan at 333-0812.

Honor Guard: The Academy Honor Guard Officer seeks and enlisted volunteers who can support two details per month for one year and who can attend training every other Wednesday from 1 to 4 p.m. The next new member meeting will be held Aug. 6-13 from noon to 4 p.m. To volunteer, contact Janet Edw- ards at 333-3323 or Staff Sgt. Hugo Reiner at 333-5621.

Sponsor Training: The Academy and Preparatory School sponsor programs need sponsors for cadets and cadet candidates. Officers in pay grades O-3 and above and enlisted Airmen in pay grades E-6 and above, or civilian service employees in GS-05 or higher pay grades are needed. Cadets are 18-28 years old and may be sponsors. To sponsor a cadet, call 333-2722; to sponsor a cadet candidate, call 333-3057.

Chess tournament
Community Activities will sponsor a U.S. Chess Federation tournament at the Milazzo Center Aug. 15, with sign-ups starting at 8:30 a.m.

There is no fee for participants, but every player must be registered with the USCF. Registration fees for adults start at $34 per year.

To sign up or learn more, contact Community Activities at 333-2928.

Evening Aerobics
The Community Center Sports and Fitness Center now offers evening aerobics classes at 5 p.m. Mondays, Wednesdays and Thursdays. To sign up or for more information, call 333-4522.

Fishing permits
Outdoor Recreation offers Academy fishing permits to fish Kettle Lakes, Ice Lakes and Man’s Lake or any of the lakes on Fairchild Recreation Area grounds. For more information, call 333-2940 or 687-9098.

School physcials
The 10th Medical Group will offer multiple appointment times for physicals throughout the summer for students who wish to participate in school sports or camp programs and are enrolled in TriCare Prime.

If a child has had a physical completed within the last 12 months prior to the start of school or sports season, he is considered current, and you can contact the medical treatment clinic where the child is enrolled to obtain a copy of the physical for school, sports or camp purposes.

To schedule your child’s physical or learn more, call the TriCare Appointment Line at 719-457-2273.

Community Center events
The Academy will hold an open space picnic, kickball and family movie today from 5:30 to 8 p.m. in the open space at the Douglas Valley Housing Area, or at the Milazzo Center if weather is inclement. Popcorn will be provided, and soda will be on sale. Attendees should bring their own blankets or lawn chairs and may bring other food and drinks.

Ballroom dance classes start at the Community Center Aug. 4, with beginners’ classes at 5:30 p.m., intermediate classes at 6:45 p.m. and swing at 8 p.m. Each course is $70 per couple or $40 per individual.

Line dance classes are taught in the Community Center Ballroom in six-week increments, with classes scheduled for 5 and 6:15 p.m. Registration is $35 per person. The next class starts Sept. 13.

A flea market is scheduled for Aug. 14 in the Base Exchange parking lot from 9 a.m. to 1 p.m. Cost is $10 for a space, $5 for a table or $15 for those who sell from their privately owned vehicles.

To book the Milazzo Center or Community Center Ballroom for your event, call Community Activities at 333-2928.

A&FRC offerings
The Academy Airmen and Family Readiness Center will host the following events.

Held Mondays (except during Transition Assistance week), 2 to 4 p.m.

Separating or retiring from the Air Force in a year or less? This mandatory briefing will help you identify benefits and services associated with your transition and beyond.

 Disabled American Veterans Medical Records Review
Today and Aug. 9, 7:30 a.m. to 4:30 p.m.

Individuals within 180 days of retirement or separation can have the DAV review their medical records in preparation of filing for Veterans Affairs Disability Compensation through the VA Form 21-526. Call for more information or an appointment.

Career Tracks
Aug. 3-4, 8:30 a.m. to 2:30 p.m.

This comprehensive two-day course helps military spouses assess and evaluate their skills, values and interests, build an effective toolkit through a career reer plan, education and volunteerism, conduct an efficient job search through research, networking and career fairs, and write a resume. You must pre-reg- ister or attend.

Mock Interviewing
Aug. 5, 9 a.m. to 1 p.m.

This class will give attendees a chance to conduct mock interviews with human resources representatives.

Spousal Training
Aug. 10, 8 to 9 a.m.

This class is mandatory for those who are assigned to sponsor a newcomer to the Air Force Academy. Contact your unit sponsorship monitor for details and to sign up.

Smooth Move
Aug. 10, 3 to 4 p.m., and Aug. 18, 9 to 10 a.m.

This mandatory class for individu- als who are PCSing from the Air Force Academy teaches proven ways to decrease the stress of an upcoming move.

Resume Writing
Aug. 11, 9 a.m. to noon

Learn different types of resume and cover letter styles and how to improve your own. Improve your resume to make it work more effectively for you. The main purpose of your resume is to entice an employer to call you for an interview. If you are not doing this for you, this class can help.

Key Spouse Training
Aug. 11, 2:30 to 4 p.m.

The Air Force Academy Key Spouse Program enables open communication between unit commanders and first ser- geants and families.

Troops to Teachers
Aug. 12, 11:30 a.m. to 1:30 p.m.

This workshop provides information for servicemembers interested in begin- ning a second career as a public school teacher. Learn how you can make the transition into this rewarding career.

Internet and Your Job Search
Aug. 17, 9 to 11 a.m.

New technology opens many doors but also requires prudence on the part of the individual searching for his next career move. Learn what to do, what not to do and how to use the Internet to help broadcast your resume during this class.

Newcomer Orientation
Aug. 19, 9 a.m. to 3 p.m.

This orientation is mandatory for all personnel new to the Academy. Spous- es are also welcome to attend.

The event is held at the Milazzo Center.

Concert in the Park
The Peterson Air Force Base Air and Space Museum Foundation will spon- sor the fourth Concert in the Park Aug. 7 at 7:11 a.m. at Peterson Airpark, 150 East Ave.

The event is free and open to active-duty and retired servicemembers, their families and Department of Defense civi- lian employees.

The concert will include music by the Air Force Academy Band and “The Old City Hangar” will be open, as will the ICBM procedures simulator and the KC-135R “Warming star” aircraft. Visitors may also tour the Cold War-era fighters and interceptors that ring the airport.

Fun By The Numbers
Like puzzles?
Then you’ll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here’s How It Works:
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
