- The Community Center is closed.

(‘ = All hours tied to early release / late reporting times).

Notification Statements / Actions For Personnel During Hazardous Weather Conditions

When trapped outdoors
1. Don’t panic - Build a fire. Sit down. Stay calm. Think.
2. Maintain your body temperature. Add layers of clothing, eat heat-producing foods (carbohydrates), find or build a shelter that will protect you from the rain and wind. Drink warm liquids.
3. Use the fire to dry clothing, heat water, signal, and help maintain your morale.
4. Prevent dehydration - Drink water (3-4 quarts per day). Don’t eat snow! Melt it first.
5. Prevent hypothermia - Watch out for cold/wet/windy conditions that cause massive heat loss.
6. Do not travel. Stay put and wait for rescue forces to find you.
7. Signal - Use a mirror, whistle, or flares to attract attention to yourself.
8. Do not give up hope - Rescuers will find you!

Do:
